

IST 263: Introduction to Front End Web Development

IST 263

Introduction to Front End Web Development (3 credits)

Class Size: 10-25

Faculty: Laurie Ferger, Assistant Teaching Professor, Syracuse University

Administrative Contact: [Tavish Van Skoik](#), Assistant Director, Project Advance

Course Catalog Description

Principles for construction and publication of multimedia documents for the Web. Incorporate a user-based approach to planning, design, implementation and management with an entrepreneurial perspective and with a focus on client/enterprise. Shared Competencies Communication Skills; Information Literacy and Technological Agility.

Course Overview

Combining entrepreneurial methods with real world projects, IST 263 is an intensive course that covers the construction and publication of websites for the Internet. Students study and utilize a user-based approach to planning, design, implementation, and management of the websites, all with an entrepreneurial focus. Students become very proficient in HTML, CSS, and PHP, and develop their final projects utilizing a Content Management System (CMS).
